

YEAR 6

MOVERS AND SHAKERS

Perrymount Primary School
Growing together, learning forever.

HOGWARTS CLASS CURRICULUM INFORMATION Spring 2025

OUR FUTURE STARTS HERE...

As a value led school we believe that all children have rights. The right to be educated, the right to be heard, the right to be treated fairly and the right to be healthy.

This term, in Year 6, we will be studying inspirational people - specifically medical pioneers, inventors and human rights activists. We will start with features that these people have in common and the qualities they possess. We will be exploring this topic through the following moral question: **Is it important who inspires our children?**

HUMANITIES

Through our 'Movers and Shakers' topic, we will be learning about people from all walks of life and through the ages.

We will research the life stories of many influential people who have: made new discoveries, fought against prejudice, triumphed over adversity, made advances in their field of expertise or transformed attitudes.

Our class text will be 'Wonder' which portrays the overriding message that you can be inspirational no matter who you are.

ENGLISH

Literacy will be taught through the use of quality texts. Our writing activities will also be inspired through our topic and we will be using authentic clips and videos as stimulus for writing narratives, reports, persuasive writing and instructions.

We will continue placing an emphasis on all children learning the set spellings that they are expected to know by Year 6, along with a strong focus on punctuation and grammar.

Reading for pleasure, as always, is high on our agenda and all children will be expected to read at home.

MATHS

In Maths, we will be using a mastery approach to help the children develop fluency in number and to enhance their problem solving strategies. Children will have work tailored to their individual needs so that they can over practice these skills at home to fully embed them.

To support your child at home, encourage them to complete their weekly homework, explore real life maths (e.g. when shopping, planning when to leave to be on time, etc) and practice basic number skills e.g. times tables. To further support you, we will be continuing to use Times Table Rock Stars over the term.

SCIENCE

Our Physics topic for this term is 'Electricity'. Children will work scientifically to develop their knowledge of electrical circuits and their symbols. They will explore the brightness of bulb by varying the voltage of cells and compare and give reasons to explain the variations.

In the second half of the term we will look at the biology unit: 'Animals Including Humans'. This will focus on our circulatory system where the children will develop their knowledge of the heart and its functions, choices that can harm circulatory systems function and why exercise is so important.

COMPUTING

This term in computing we will be learning more about programming. This unit explores the concept of variables in programming through games in Scratch. First, learners find out what variables are and relate them to real-world examples of values that can be set and changed. Then they use variables to create a simulation of a scoreboard.

PE

PE this term, will be on Wednesday and Friday. During the first half of the Spring term the children will take part in cricket lessons and learning the rules and skills of cricket. In the second part of the Spring term, the focus will be on badminton. Please make sure your child comes to school with the correct kit each week, including the correct footwear.

RE

Religious Education this term will be focusing on Judaism and The Journey of Life and Death. In Judaism the children will be investigating the Shema, the Synagogue and what a Bar/Bat Mitvah is. The Journey of Life and death entails exploring people's beliefs of life and life after death across the six main religions. The unit is designed to encourage the children to reflect on and express their hopes for the future.

ART/ DT

This term we will be focusing on our art and design skills. We will be developing design, drawing, craft, painting and art appreciation skills. Throughout the term we will explore expressive drawing techniques and experimental mark making, consider how symbolism in art can convey meaning, apply understanding of the drawing technique chiaroscuro and explore the work of Diego Rivera.

MUSIC

Our weekly music lessons will allow us to participate in whole class ukulele lessons. We will build on what we have already learned in Year 5 and develop our skills further. We will also continue to learn new songs.

MFL

The children will continue to develop their oracy, literacy and intercultural understanding of French. This term, we will be building on our previous learning as well as talking about different hobbies and activities the children may do during the week and weekends.

PHSE

In PHSE the children will be continuing to focus on keeping safe with a particular emphasis on keeping safe online. They will be looking at how to identify a secure website, staying safe why messaging and gaming online and the use of social media. The children will also be looking at how to keep safe when outdoors.
